

S.T.A.R. format:

Situation, Task, Action, Result — concisely written as bullet points.

1. Project Management / Web Development

Led a team of 3 to develop a dynamic e-commerce website using React and Firebase, reducing page load time by 40% and improving user engagement through real-time inventory updates.

2. Machine Learning / Academic Project

Built a sentiment analysis model using Python and Scikit-learn to classify 5,000+ tweets, achieving 86% accuracy and presenting findings at the college-level tech symposium.

3. Automation / Internship Task

Automated monthly report generation using Python and Excel macros during internship at XYZ Pvt. Ltd., reducing manual effort by 70% and saving ~10 hours per month.

4. Cybersecurity / Coursework

Conducted a vulnerability scan on simulated university networks using Wireshark and Nmap, identifying 8 potential threats and suggesting mitigation strategies in a final report.

5. Mobile App Development

Developed an Android app using Kotlin to track daily habits with local database storage, achieving 500+ downloads on the Play Store and 4.6-star user feedback.

Prompts To Create Own STAR Resume Points

Prompt 1: “Tech Challenge Solved”

Think of a time you faced a technical challenge (in a project, lab, internship, or course) and successfully solved it.

- **S:** What was the challenge or situation?
 - **T:** What was your role or objective?
 - **A:** What steps did you take to solve it?
 - **R:** What was the outcome or result?
-

Prompt 2: “Team Collaboration & Initiative”

Think of a project where you worked in a team.

- **S:** What was the context of the team work?
 - **T:** What were you responsible for?
 - **A:** What action did *you* take (especially if you showed initiative)?
 - **R:** What was the result for the team or project?
-
